Baby Maverick's Liver Transplant Journey

<https://www.gofundme.com/f/mavericks-liver-transplant-journey>

P.O. Christopher Brower (76 Pct) and his wife had their first child, Maverick, on December 27, 2019. Sadly Maverick experienced several life threatening health issues and after several emergency trips to the hospital he was diagnosed with a rare genetic urea cycle disorder called O.T.C. deficiency. The only cure for OTC deficiency is a Liver transplant. Maverick's current medication costs are in the tens of thousands and will only increase after the surgery.

PLEASE HELP BABY MAVERICK BE ABLE TO LIVE HIS BEST LIFE POSSIBLE.
